

VOLUNTARY REMEDIATION PROGRAM DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

PROJECT SUMMARY

Site Name:	Panhandle Eastern, Edgerton Compressor Station
Applicant's Name:	Panhandle Eastern Pipe Line Company
Site Location:	25419 Pauling Road Monroeville Allen County
VRP Site Number:	6980304
Project Manager:	Damon Ridley
Date Application Received:	March, 1999
Date Project Completed:	January, 2000
Project Duration:	1 year, 10 months
Contaminant Group(s):	Semi-Volatile Organic Compounds(SVOCs), PCBs
Media Cleaned Up:	Surface Soils, Subsurface Soils
Cleanup Goals Achieved:	Tier II Nonresidential
Deed/Land Use Restrictions:	Nonresidential

Project Description: The site is part of a natural gas pipe line system extending from Texas to Michigan. This specific site was constructed in 1940. Prior to 1973, lubricants containing PCBs were used in some of the air compressors associated with the air tanks and the supply system at the compressor station. The site is one of five pumping stations in the state of Indiana, all part of a company-wide comprehensive Phase II site investigation.

Remediation consisted of the removal and disposal of contaminated soils in an approved landfill. The investigation of the 41-acre site included over 250 surface soil, subsurface soil, and sediment samples over the potentially-impacted areas. Approximately 256 cubic yards or 385 tons of soil were remediated by machine or hand excavation methods for off-site disposal.

Confirmation sampling demonstrated that the applicant successfully attained the VRP Tier II Nonresidential Cleanup Goals.
